

Drug Facts

Active Ingredient (in each lozenge)

Menthol 5mg. Antitussive (cough suppressant) /oral anesthetic

Purposes

Uses

Temporarily relieves:

- cough due to minor throat and bronchial irritation occurring with the common cold or inhaled irritants.
- occasional minor irritation, pain, sore mouth, and sore throat.

Warnings

Sore throat warning If sore throat is severe, persists more than 2 days, is accompanied or followed by fever, headache, rash, swelling, nausea, or vomiting, consult a doctor promptly.

Ask a doctor before use if you have

- persistent or chronic cough as occurs with smoking, asthma or emphysema.
- cough that occurs with excessive phlegm (mucus).

Stop use and ask a doctor if

- cough persists for more than 1 week, tends to recur, or is accompanied by fever, rash or persistent headache. A persistent cough may be a sign of a serious condition.
- sore mouth symptoms do not improve in 7 days.

If pregnant or breastfeeding, ask a health professional before use.
Keep out of reach of children.

Directions

- adults and children 2 years and over: dissolve lozenge slowly in the mouth. Repeat every 2 hours as needed or as directed by a doctor.
- children under 2 years of age: ask a doctor.
